“ZDF Enterprises is bringing a promising batch of new kids’ series to MIPCOM, with the new Jonathan M. Shiff production *Lightning Point* expected to grab lots of attention. The adventures of surf-crazy alien teen girls in Australia are sure to find takers around the world. Already a hit in many markets, *Dance Academy* returns with a second season that sees our favorite dance students

getting really serious about their studies. A refreshingly bizarre series for the little ones is *Michel*, whose hero is furry little four-eyed monster who’s otherwise perfectly normal. Preschoolers can also look forward to a second season of prehistoric adventures with a little cave girl in *Igam Ogam*. These are just some of the highlights of our new and exciting programming events for children and youths.”
