"Huss" feels both like pity and power. as such an equalised huss, johan will menace, here an equal, katherine. they share in a similar situation.

"Huss" felt as if every one of the characters in the novel were created to be a kind of abstract representation of a theme or idea. they all seem to be struggling with something.

The theme of the novel is the struggle for identity and self-awareness. the title itself, "huss", is an abbreviation of "husk", which means "a thin, outer covering".

The characters in the novel are all searching for their own identities, and the novel explores the idea that we are all essentially strangers to each other.

The novel is a powerful exploration of the human condition, and the book's language is beautiful and evocative.
