"The young and the youngest get our full attention this season with programs for various age groups that all have one thing in common: they all soar on the wings of fantasy! The second season of *The Elephant Princess* promises a gripping show of force between love and dark magic. There's also great interest in another live-action series for teens and tweens from

Down Under, *Dance Academy*. Our new animated series *Tempo Express* is a time-travel action-adventure series that makes the past come alive. Preschoolers are in for a treat with the new animated series *Ludovic* and the eagerly anticipated third season of *Laura's Star*. Both series emphasize the power of the imagination, with teddy bear *Ludovic* bringing inanimate objects to life, and *Laura* communicating with her little star. Finally, you can also look forward to more great animated revivals of children's classics being co-produced with India's DQ Entertainment."
